-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1711

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bolte in view of Kest.

See Paper No. 9, paragraphs 3-5.

Applicant's arguments filed 6-2004 have been fully considered but they are not persuasive. The applicants argue that Bolte doesn't teach pressure sensitive adhesives. Bolte discloses adhesives in general and doesn't exclude pressure sensitive adhesives. They argue that he doesn't disclose any NCO/hardener functionality ratio. Kest teaches the same NCO/OH ratio for pressure sensitive adhesives. The applicants argue that Kest doesn't teach his NCO/OH ratio for the ratio between the NCO groups of a prepolymer and the OH groups of the hardener. In examples 2 and 5, Kest shows adhesives formed from prepolymers and hardeners. In example 2, the prepolymer would have an NCO content of about 5 % and the NCO/OH ratio between the prepolymer and hardener is 1/1.
